# Impact Assessment and Landscapes in CGIAR

Workshop organized by CGIAR ISPC’s  
Standing Panel on Impact Assessment (SPIA)  
Protea Hotel, Technopark, Stellenbosch, South Africa

## AGENDA

### Monday, 8 October 2018

|          |              | Review objectives. The meeting responds to various initiatives that are aligned but not exactly the same so it is worth spending a bit of time clarifying what we want to achieve. Some objectives include:  
|          |              | - Contribute to the development of the current FTA-PIM-WLE land restoration initiative, and the potential CGIAR special initiative on landscapes, in particular in terms of thinking evaluation designs and measurement of (multiple and inter-related) outcomes.  
|          |              | - Progress on a plan for generating evidence of impact of CGIAR NRM research in general and “landscape research” in particular, including if possible ideas for specific studies  
|          |              | - Provide input into the planning of FTA’s proposed impact assessment workshop to be held in 2019  
|          |              | - Input into SPIA (Wednesday) and IWMI (Thursday) breakout sessions in Science Forum  
| 09:30    | Izabella Koziell (WLE) and Vincent Gitz (FTA) and Peter Gardiner (SMO) [all virtual] | Session 2. Landscape initiatives in CGIAR  
|          |              | Chair: Lakshmi Krishnan                                                  |
|          |              | Presentation on behalf of FTA-PIM-WLE covering the Nairobi workshop1, the short-term plans of the 3 CRPs, and the longer term plan for a CGIAR Landscapes initiative.  
|          |              | - Comments from PIM, FTA, and SMO  
|          |              | - Discussion managed by WLE-PIM-FTA. One key thing to cover is how impact assessment (IA) can contribute at this point, recognizing that these are current and future activities  
| 10:30    |              | Coffee break                                                             |

---

1 Workshop summary from Vincent to be shared in advance. Presentations as well?
11:00  Session 2 continues

11:30  **Session 3. Measurement and evaluation design issues in landscape IAs**  Chair: Nancy Johnson

Despite the relative lack of impact evidence for landscape approaches (Sayer et al., 2017; Reed et al.) and NRM research, there are some interesting things happening that could help to fill these gaps. The purpose of this session is to identify and share experience with promising approaches.

Some elements to motivate discussions:
- Recent experiences on assessing landscape interventions – Update from Mark Smith on IUCN’s SUSTAIN-Africa approach.
- Examples of past CG impact assessments on landscapes (what was the research, how is influence/impact conceptualized and measured?) – examples from participants
- Promising directions in methods (e.g., Bayesian Belief Networks), measurement and data collection (e.g., geospatial; program data from IATI-type initiatives); linking data from different sources – suggestions from participants

12:30  Lunch

13:30  Session 3 continues

14:00  **Session 4. Identifying and develop possible topics for impact studies**  Chair: James Stevenson

Using concrete examples, suggested and selected in advance by participants, we would work through how a rigorous impact assessment could be designed and implemented. In addition to providing useful feedback for study teams, working through examples together will be useful in terms of coming to agreement (or at least a shared understanding) of key things like the research output, the impact pathway, the impact questions to be answered, the possible data and methods, estimated budget, etc.

- WLE example (30 minutes presentation and discussion) – Soumya (virtual) on a landscapes IA in Tajikistan
- PIM example – FES in India by Ruth (30 minutes total)
- FTA example (30 minutes) – Brian Belcher
- SPIA example (30 minutes) – Frederic Kosmowski on World Bank’s "Resilient Landscapes and Livelihoods Project" in Ethiopia

15:30  Coffee

15:45  Session 4 continues

16:15  **Session 5. Summary and next steps**  Chair: Nancy Johnson

Review of progress on objectives; next steps  Izabella, Karen, Brian (FTA workshop), others

17:00  Close of Meeting

---

2 Please share with me any background material in advance. We’ll make it available in a Dropbox folder.
